

Cross-Sector Collaboration Evaluation Survey

Measuring Cross-sector Collaboration in the Gambling Services Sector

The central aim of this survey is to determine the needs and interests regarding inter-agency and intra-agency collaboration in the Gambling Services sector. The survey focuses upon the types of collaborative activities that you have been involved in within the past three months.

The survey will take about 15 minutes to complete. We are interested in your honest feedback about your activities and your organisation as we seek to understand the supports and barriers to collaboration in your service.

The following questions ask about contact you have had with other workers from other agencies/programs either within your organisation or outside of your organisation regarding people with co-occurring issues including problem gambling. This could include working with mental health services, family services, community health, AOD and other disability services.

It is important that you answer all the questions and include your name and position in order for us to compare the results with a post-implementation survey that you will be asked to complete in 3-4 months.

Your contributions will play a valuable role in helping us evaluate this initiative and map changes in cross-sector collaboration within your region.

Your name: _____ Date: _____

Your professional role: _____

Could you please indicate below the activities you have undertaken in the past three months, and the amount of this activity:

Activity	Please indicate the number of times this activity has occurred in the past <u>3 months</u> as part of your work role
